

Center For Pediatric Medicine

Patient Name: _____

DOB: _____

Effective January 1, 2009, the State of Connecticut requires us to ask patients ages 6 months through 72 months the following questions to assess your child's exposure to lead.

	Yes	No
1. Does your child live in or regularly visit a house that was built before 1960? This would include a day care center, preschool, the home of a babysitter or relative, a recent move, etc.		
2. Does your child live in or regularly visit a house built before 1978 with recent, ongoing, or planned renovation or remodeling?		
3. Does your child have a history of an elevated blood lead level?		
4. Does your child have a sibling, housemate, or playmate being followed or treated for lead poisoning?		
5. Does your child frequently come in contact with an adult whose job or hobby involves exposure to lead? Examples include construction, welding, automotive repair, other trades practiced in your community, stained glass making, using lead solder, artist's paints or ceramic glazed, etc.?		
6. Does your child live near an active lead smelter, battery recycling plant, or other industry likely to release lead?		
7. Does your child live near a heavily traveled major highway where soil and dust may be contaminated with lead?		
8. Has your child been given any home remedies? Home remedies containing lead include, but are not limited to: azarcon (also known as rueda, coral, Maria Luisa, alacorn, liga), albayalde, greta, pay-loo-ah, ghasard, bala goli, kandu, kohl, litargirio, bebetina, chyawan prash, etc.		
9. Ask any additional questions that may be specific to situations that exist in a particular community, such as an abandoned or operating industrial complex or waste disposal site. Has your child ever lived outside the U.S.? Does your family use pottery for cooking, eating, or drinking?
